

LEAN LEARNING DAY

This workshop will involve two streams to cater for those new at Lean and those already undertaking Lean. The Lean Manufacturing Workshop will give attendees the opportunity to better understand the benefits of implementing Lean Manufacturing within their business. The workshop will include presentations on: Introduction to Lean, TPM, Visual Goal Alignment, Lean Simulation Exercise, Value Stream Mapping, 5S, 6 Sigma as well as case studies of the impact & benefits gained from using each.

Learn how to:

- * Engage staff in Lean Manufacturing
- * Identify improvement priorities for process improvement
- * Establish safe & efficient work areas
- * Create a Continuous Improvement (CI) culture
- * Gain accountability for performance outcomes
- * Increase OEE, reduce waste & improve throughput

The Workshop is suitable to seasoned practitioners looking to further improve their business as well as those looking to start down the Lean path.

- Lunch, morning and afternoon tea included
- Need help on the day? Contact Ray Edwards 0413 083 376
