

# AME QLD LEAN SKILLS NIGHT - ANDON

Andon – You may have heard about it, but what is it? Michael Taylor explores this tool and demonstrates how you can apply it as part of your Continuous Improvement journey.

Andon is a visual manufacturing tool that can help highlight problems or actions in your process. The program will:

- Explain the concept and its origins
- Detail different types of application
- Present some of the Andon products available in the marketplace
- Show an example of an Andon system in use

This will be an interactive presentation, and all present are invited to contribute to the discussion based on your experiences.

**Wednesday 8th April 2009  
5:30pm to 6:30pm**

**Skills Tech  
776 Kingsford Smith Drive, Eagle Farm QLD**
